CALIFORNIA REGULATORY ENVIRONMENT

1. CPUC has not met its burden of proving that cellular rates are unreasonable, discriminatory, or that cellular service is a replacement for land line telephone exchange service for a substantial portion of the telephone land line exchange service within the state.
2. Prices in California have declined over time.
 - Nominal prices have declined.
 - Real prices have declined.
 - Numerous promotions, rate plans and rate decreases over past five years.
 - Minority of customers still subscribe to the basic plan. Remaining customers subscribe to plans tailored to their needs.
3. Based on GTE's market research, market share has not remained static over time. Share fluctuates between facilities based carriers. GTEM resellers share has remained relatively constant.
4. California regulation does not benefit consumers, rather it is designed to benefit resellers.
5. Issue of excess capacity is irrelevant.
